Solutions engineer looking to become a full-time web developer. I have strong skills in **JavaScript**, **PHP**, **Next.js**, **React**, and much more through 3 years of professional experience and personal projects.

Work Experience

Valparaiso University - Solutions engineer

November 2020 - present

Valparaiso, Indiana

- Assist in developing and maintaining our in-house web applications and our web servers
- Developed an admin dashboard for supervisors to monitor their student workers in React
- Create PHP scripts working with 3rd party APIs
- Finished development on a mobile app for the university transportation system (currently used by 1,000+ users)

Technical Projects

Leave Request System

- Web application for staff and faculty to request leave and keep track of holidays and hours
- Built with **JavaScript**, **HTML**, **jQuery**, **PHP**, **MySQL**, and **Bootstrap**
- Worked through the development, testing, and deployment

MyPost

<https://next-js-tutorial-nine-xi.vercel.app/>

- A project to learn Next.js. Created with **React**, **Next.js**, **Tailwind**, and **MongoDB**
- A very simple posting platform with user authentication
- Still adding new features and a work in progress as I learn new technologies

Guess That Pokémon

<https://noahrod108.github.io/guess-that-pokemon/>

- **React** application using the Pokemon API to create a small guessing game
- Future plans to remake in Next.js and include user accounts and backend

Skills

- JavaScript, HTML, CSS, PHP
- React, jQuery, Node.js, Bootstrap, Express.js, Next.js
- MySQL, MongoDB
- Linux CLI, Windows CLI

Education

Purdue University Northwest 2015 - 2020

Bachelor of Science in Computer Information Technology
