I have strong skills in **JavaScript, PHP, Next.js, React, MySQL**, and much more through over 4 years of professional experience and personal projects. I can bring an immediate impact and always excited to learn new technologies.

Work Experience - Professional Work

Valparaiso University - Solutions engineer

November 2020 - present

Valparaiso, Indiana

- I assist in developing and maintaining our in-house web applications and our web servers
- I use Jira to manage ticket requests.
- I developed several PHP integration scripts for our yearly placement tests. The scripts reduced the costs yearly by 8% and are increasing.
- I Finished development on a mobile app for the university transportation system (currently used by 1,000+users)

Leave Request System

- Web application for staff and faculty to request leave and keep track of holidays and hours
- Built with **JavaScript, HTML, jQuery, PHP, MySQL**, and **Bootstrap**
- Worked through the development, testing, and deployment

Transit Tracker

- A mobile application to track and schedule a university shuttle
- Built with the **Cordova** framework using **PHP, JavaScript**, and **MySQL**
- I have maintained and added new features to the application. I am responsible for yearly deployments.

Skills

- JavaScript, HTML, CSS, PHP, Python, TypeScript, JSON, jQuery, C#, Tailwind, React, Bootstrap
- Express.js, Node.js, Next.js, MySQL, MongoDB, GraphQL
- Linux, Windows
- SVN and GIT version control
- LAMP and MERN stack

Technical Projects - Personal Work

Get Home

<https://get-home-chi.vercel.app/>

- A web application created with **Next.js** to build a property rental website. This application uses **MongoDB** on the backend. I also used **Cloudinary** to host our images.
- The project has many features like user authentication, RESTful API routes, and CRUD functionality.

Education

Purdue University Northwest

2015 - 2020

Bachelor of Science in Computer Information Technology
