

Noah Rodriguez

Full-Stack Developer

noaherodriguez18@gmail.com | 219-669-1791 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Full-Stack Developer with 5 years of experience building and maintaining internal web applications, REST APIs, and distributed data platforms. Proficient in ES6+, TypeScript, React, Node.js, and C#, with hands-on experience across relational and non-relational databases. Daily user of AI-assisted development tools. I work great with technical and non-technical teams while managing multiple projects at once.

EXPERIENCE

Full-Stack Developer, Valparaiso University

Valparaiso, IN | Nov 2020 - Present

- Built and maintained full-stack internal platforms using JavaScript (ES6+), TypeScript, React, Node.js, PHP, and MySQL, improving UX and backend scalability across multiple applications.
- Designed RESTful backend APIs in C# and ASP.NET Core to consolidate multiple legacy systems into a centralized data service, applying service-oriented architecture and microservices principles.
- Optimized MySQL relational database schemas and queries to reduce page load times and improve system performance, availability, and long-term maintainability.
- Replaced a vendor service with a custom-built solution, saving about \$20,000 per year.
- Used AI-assisted development tools (Claude) daily to accelerate delivery, generate test coverage, and improve code review efficiency.
- Automated workflows, cutting additional operational costs by 12%. Maintained WCAG accessibility compliance and cross-browser compatibility across all platforms.

KEY PROJECTS – Professional Work

Leave Request System

- Tasked with the completion of an internal platform for leave and holiday tracking using PHP 8.x, JavaScript, MySQL, and Bootstrap. Owned the full delivery cycle from requirements to deployment, replacing a paid third-party service and saving \$20K per year.

Online Staff Directory

- Built a dynamic single-page application using React, PHP, and MySQL to centralize staff, faculty, and student records across systems. Replaced multiple disconnected data sources with a single internal platform to streamline Active Directory and Google Workspace administration.

Student Roster

- Designed and delivered an internal web app using React, TypeScript, Tailwind, PHP, and MySQL to centralize student worker data previously scattered across multiple systems. Currently in use by the IT department.

SKILLS

Languages: JavaScript (ES6+), TypeScript, PHP, C#, HTML5, CSS3, SQL

Frameworks: React, Next.js, Angular, Node.js, Express.js, Laravel, Bootstrap, Tailwind, Redux

APIs and Architecture: REST, ASP.NET Core, Service-Oriented Architecture, Microservices

Databases: MySQL, MongoDB, query optimization

AI Tools: Claude

Tooling: Git, Apache, Jira, Jest, VS Code, WordPress

EDUCATION

B.S. Computer Information Technology

Purdue University Northwest

2015 - 2020
