I'm a developer with five years of experience in solutions engineering and full-stack web development. I've worked extensively with **PHP, MySQL, WordPress, web hosting administration**, and **LAMP** stack environments. I have worked on **cross-browser** compatibility and **WCAG** accessibility compliance. I am skilled at optimizing databases and maintaining responsive, user-friendly, and accessible design standards.

Professional Work

Valparaiso University - Solutions engineer

Valparaiso, Indiana | November 2020 - present

- I have led full-stack development of internal tools and university systems using **PHP, JavaScript, MySQL, jQuery, AJAX**, and **Bootstrap**. I worked on both the front-end and back-end, creating better user interfaces and scalable back-ends.
- I work with **GAM (Google Apps Manager)** and other Google APIs, such as **Google Maps** and **Google Analytics**, to reduce redundant tasks and increase the productivity of staff and faculty.
- Developed **backend scripts that automated** placement testing, reducing QA time and **cutting costs by 12%**.
- I designed and deployed custom **WordPress themes** and **plugins**.
- I have **upgraded our deprecated functions** to improve security and functionality. I performed **updates on our applications from PHP 5.x to PHP 8.x**

Key Projects - Professional Work

Leave Request System

- Web application for staff and faculty to request leave and keep track of holidays and hours. Built with **JavaScript, HTML, jQuery, PHP (8.x), MySQL**, and **Bootstrap**
- Worked through the development, testing, and deployment
- Allowed us to retire a paid-for service, **saving around \$20,000/yr** and providing a customizable experience

Online Directory

- A photo directory used by IT staff members to manage students, staff, and faculty.
- Centralizes data from different systems to streamline tasks for **Active Directory** and **Google**.
- Built using **PHP, JavaScript, HTML, CSS, ImageMagick, Angular**, and **MySQL**

Database Maintenance and Web hosting

- I performed **database optimization**, drastically **reducing page load** times.
- Restructured **MySQL** databases to **eliminate redundancy** and **improve query readability**.
- I am familiar with managing **SSL certificates** and other web hosting tasks.

Skills

- **Languages:** PHP, JavaScript ES6+, TypeScript, Python, C#, HTML5, CSS3 SASS/LESS, SQL, JSON
- **Frameworks & Libraries:** React, Next.js, Angular, Laravel, Express.js, Node.js, Bootstrap, jQuery, Tailwind, Redux, Swift
- **Databases:** MySQL, MongoDB
- **Tools & Platforms:** Git, SVN, Jira, WordPress, Apache, Cordova, RESTful APIs, VS Code, Jest, Jenkins
- **Environments:** LAMP Stack, MERN Stack, WordPress, Linux, Windows

Education

2015 - 2020

Purdue University Northwest

Bachelor of Science in Computer Information Technology
